Volunteers turn out in force to create new parkland

The San Remo Foreshore Committee of Management (SRFCoM) would like to sincerely thank those community members who were able assist with the planting of some 6000 trees and shrubs at the site of the recent foreshore stabilisation work at San Remo on Saturday 4th October.

Chairman of the Committee Andy Chappell was most impressed the efforts of the volunteers, saying, "It was so impressive to see community members from very young to quite senior (and a dog!) arriving and getting stuck right in. It was hard and difficult soil to plant in, and on a considerable slope, but the team wasn't fazed and finished the job."

"Our volunteers, together with Vicroads and Landcare are creating an attractive piece of new parkland that will link to the existing walking track from the centre of San Remo. The 6000 plants are of various species and are from Coastal Headland Scrub category."

" Special thanks to committee member Ray Cummings, who so smoothly co-ordinated the day's activities.
