Phillip Island Road support project applauded

The San Remo Foreshore Committee of Management (SRFCoM) is pleased to be playing a part in the major \$2M project announced by The Hon. Ken Smith, Member for Bass, to reduce the impact of coastal erosion on the San Remo foreshore.

The Committee will be closely involved during the project to ensure protection of the foreshore and the continuation of the walking track along this northerly fringe of Western Port Bay.

“Clearly this is a vital project to protect our foreshore and also to ensure access to our beautiful part of the world” Andy Chappell, Chair of the SRFCoM, said.

“This is one of a series of important projects we (the new committee) are putting our minds to. Others include an upgrade to the pelican feeding area near the jetty, walking track development and continuing the thinking around how best to sensitively improve the overall waterfront area of San Remo. The recent work by RMIT students on this area has generated very interesting ideas for the committee to work through”.
